

The office network, shipped to every remote worker.

A small box arrives at each employee's door. They plug it into power and their home internet. Their work network comes online in minutes: private WiFi, an encrypted line to company systems, and our team keeping it healthy around the clock. The office keeps the network it already runs.

\$45 per worker / month · hardware included · nothing upfront

01

We build it at our bench

Work WiFi, security policy, and the encrypted tunnel load onto each unit before it ships. It knows its company and its employee.

02

The employee plugs it in

Power, then one cable to the home router. The work network appears in minutes, with zero apps to install.

03

Every unit reports to us

Our operations center watches each connection around the clock. IT gets one dashboard for the whole remote team.

HOME OFFICE

Worker's gateway

Private work WiFi, separate from the family's network

SNSYS

Operations center

Problems handled before they interrupt anyone, around the clock

HEADQUARTERS

Office bridge

Included free. Plugs into the network the office already runs, and changes none of it

THE COMPANY GETS

- Every remote connection on one dashboard, with health and alerts for the whole team
- Access scoped per person, workers reach the systems the company names
- A clean answer for insurers and auditors, remote access as a managed, documented list
- Home internet trouble routed to us, off the IT backlog

THE EMPLOYEE GETS

- A work network of their own, drives and tools open like at the office
- Fast WiFi 7 at their desk, built for all-day video calls
- A hard line around personal life, family WiFi and devices stay invisible to us and the employer
- Help that already sees the problem before the first hello

ESSENTIAL

\$45

per worker / mo

Monitoring 24/7, support on business hours

MANAGED

\$54

per worker / mo

Extended hours, priority queue, monthly IT report

COMPLETE

\$68

per worker / mo

Live coverage 24/7, 15-minute critical response

THE HARDWARE

Enterprise gear, license free

WiFi 7 · 10G · enterprise firewall. **\$0 license fees, forever.** Comparable teleworker gateways carry \$100 to \$217 per device, every year.

Five-worker minimum · twelve-month initial term · hardware, shipping, and replacements included
